■ ■ ■ STEEL FABRICATION AND ANTICORROSION PROTECTION

SIDI Ltd was established in 1992 in the city of Varna with a subject of activity concentrated mostly on performing repair as well as construction and assembly works on industrial sites and facilities. The geographic location and the economic situation determined the priority fields of company development directed mainly to the regional industry and ship repair.

The company established itself in the various industry branches and the ship repair thanks to the ability of offering specific complex and economically beneficial solutions depending on the particular project and its terms.

Sidi Ltd is technically and professionally prepared for fabrication and erection of pipelines , reservoirs , high risk facilities and different kinds of steel structures depend on the needs of various industry branches.

1.Fabrication and erection of different kind of steel structures according to the requirements of ISO 1090.

2.Fabrication, erection and repair works of reservoirs.

3.Erection, warranty service and repair works of pipelines.

4.Repair works and maintenance of high risk facilities.

5.Anticorrosion protection of steel structures and facilities according to the requirements of ISO 12 944

6.Applying of fireproofing protection for protection of cellulosic and hydrocarbon fire.

“SIDI” Ltd has highly qualified specialists and engineers. The total number of employees varies between 50 and 80 people, depending on the volume of work performed, distributed as following:

Nº	Employees	number
1	Engineers and technical staff	8
2	Administration	5
3	Machine operators	5
4	Fitters, welders, painters	50 - 80

SIDI Ltd is specialized company for performing of projects in the area of steel structures, pipelines, reservoirs and their corrosion protection for industrial services. The company has concentrated its efforts and works in several major industries.

CHEMICAL INDUSTRY

- Fabrication and erection works of steel structures, reservoirs and pipelines
- Anticorrosion protection of steel structures, reservoirs, stacks and cooling towers

Infrastructure

- Fabrication and erection of steel structures
- Anticorrosion protection of steel structure engineering facilities of railways and motorways
- Anticorrosion protection of means of transport: wagons, containers, trucks
- Applying of fireproofing protection

Energetics

- Fabrication and erection of steel structures
- Fabrication and erection of pipelines, reservoirs, heat exchangers, cooling towers
- Anticorrosion protection of water lines, heat exchanger, cooling towers, reservoirs and steel structures

Marine industry

- Anticorrosion protection of steel structure of port facilities
- Anticorrosion protection of hulls, decks, cargo tanks, barges in the ship repair activity

Oil industry

- Fabrication and erection of steel structures
- Anticorrosion protection of steel structures, pipelines and reservoirs
- Application of fire protection for hydrocarbon fire

Sidi Ltd. has a modern workshop with machinery and equipment manufactured by leading companies in the field. Our equipment is according the requirements of international ISO standards.

The base is situated on an area of 10000 m² and is located in the town of Devnya, 25 km from town of Varna and 3 km from the port of Varna - West. It consists of a closed production site of 2400 m², open source 7000 m² , closed warehouse, administration.

Sidi Ltd has modern and high productive equipment for the production of steel structures and steel items.

By complying with the requirements of environmental protection standards and limiting the emission of harmful emissions into the atmosphere, the abrasive blast cleaning and painting operations of elements and structures are carried out in blasting and painting chambers.
