Past and present

Dani 151 Ltd was established in 1996 and started the business with production of sleeves for shafts, mufflers for cars and other auto parts. Gradually our company was directed and developed by the customers' needs, improving in time to be in favor of our partners as much as possible. Today the company is manufacturing:

Metal components;

Rubber, rubber-metal and rubber-textile components;

Silicone components and components from specific materials;

Hydraulic seals;

Polyurethane, polyamide and other plastic components;

Instrumental tooling;

Prototypes and sample components;

Branches
