

# ITALDEP<sub>srl</sub>

SERVIZI PER LE ACQUE

## OUR PRESENTATION

**Our company, Italdep S.r.l., was established on the basis of twenty years of technical and entrepreneurial experience gained in some of the most important companies in the field of water treatment, integrated water service and industrial plant engineering.**

**The objective of the establishment of Italdep S.r.l. is to support customers in the realization of plants with direct “turnkey” contracts or with simple interventions even on a daily basis.**

# NETWORK

With regard to the *purification and potable water sector*, we have gained excellent knowledge by acquiring clients such as

**GPG S.r.l.**

**BrianzAcque**

**AcqueVeronesi**

**AqA - Gruppo Tea**

**AcqueBresciane**

We have built plants for almost all public agencies present in northern Italy, working as subcontractors.

Italdep S.r.l. is able to offer construction and maintenance of urban and industrial wastewater treatment plants, drinking water, primary and process water, with related on-site emergency repairs of bridges, piping, deteriorated filters, temporary by-passes, mechanical parts replacements, etc., including the supply of materials to be installed and the accompanying carpentry.

Our Team specializes in welding ferrous and austenitic metals.

Procedures and arrangements are adopted to ensure maximum safety; in addition, we have invested in comprehensive training for our employees, including on working in confined environments, in accordance with Legislative Decree 81/2008.

The quality of processes is confirmed by UNI EN ISO 9001:2015 Certification.

# DEPURATORS

Below are some of the  
installations made

A photograph of a water treatment facility showing a dense network of industrial stainless steel pipes. The pipes are arranged in a complex, multi-level system with various elbows, tees, and valves. Some valves have red handwheels, while others are blue. The lighting is bright, highlighting the metallic surfaces. In the foreground, a large horizontal pipe has the handwritten number 'AL 53' on it. The background shows more pipes and equipment, suggesting a large-scale installation.

# WATER PURIFIERS
