

WHO ARE WE

Hidravlon-1 is a long-standing partner of all shipbuilding and ship repair companies in Bulgaria, in the field of hydraulic systems. Over 3 decades after our foundation, our ambition is to continue to be the most reliable possible partner for the repair and supply of hydraulic elements in the region. The company has a team capable of overcoming even the most difficult tasks, and we dare to say that we succeed every day.

From 2023, the company's team and machine park are expanding significantly, with the aim of increasing the scope of engineering and production services. In 2024 a 3-axis turning center with center distance of 2000mm and live tools for milling operations is also to be delivered

The company specializes in providing customized solutions for design, material supply and fabrication of parts from ferrous and non-ferrous metals, engineering plastics, etc., with the team's main expertise in hydraulics and spare parts

The service specializes in marine hydraulic equipment

Yanaki Yanakiev founded Hydravlon in the city of Varna.

1991

Hydravlon becomes the official distributor of international brands such as TRALE, TECPOS, SUNFAB and BLACK BRUIN

Commercial and distribution activity

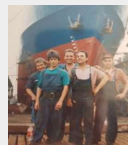

2019

2008

A control system according to ISO:9001 is introduced

Meanwhile, a service for mobile and industrial equipment is also being developed,

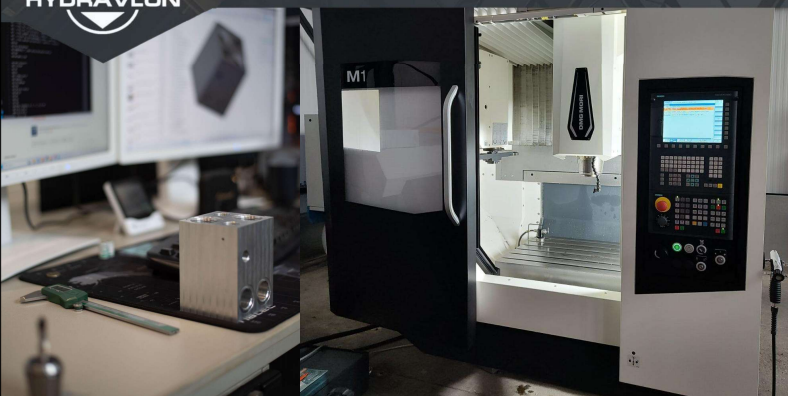

2024r.

Our new commercial and production center also opens its doors.

It houses new CNC machine tools, a modern showroom and warehouse

Complete engineering solutions from idea to finished detail

Preparation of measurement protocols

Measurement with a deviation of 3 μ m

Гъвкави решения оптимизирани за Вашия детайл

Choose our CNC turning and milling manufacturing services and discover the difference:

1. Uncompromising quality: Our machines and processes guarantee precise and accurate results every time.
2. Fast turnaround: Our dedicated team and automated systems ensure timely project completion.
3. Cost-effectiveness: We offer competitive pricing without compromising on quality or service.
4. Flexibility: Our services can handle a wide range of materials and applications.
5. Customized solutions: We collaborate with you to provide solutions specific to your industry.

In addition to repairs and the production of parts, Hydravlon also offers:

1. production of industrial and hydraulic hoses for high pressure
2. hydraulic components in stock
3. delivery of original spare parts
4. welding services (TIG, MIG/MAG, Argon)
5. finishing treatments from established partners (blasting, sanding, paint, anodizing, etc.)
6. assembly of assemblies or individual components

Our team is available to answer any of your questions!
